

Woman's Power Over Man

Woman's most glorious endowment is the power to awaken and hold the pure and honest love of a worthy man. When she loses it and still loves on, no one in the wide world can know the heart agony she endures. The woman who suffers from weakness and derangement of her special womanly organism soon loses the power to sway the heart of a man. Her general health suffers and she loses her good looks, her attractiveness, her amiability and her power and prestige as a woman.

Dr. R. V. Pierce, of Buffalo, N.Y., with the assistance of his staff of able physicians, has prescribed for and cured many thousands of women. He has devised a successful remedy for women's ailments. It is known as Dr. Pierce's Favorite Prescription. It is a positive specific for the weaknesses and disorders peculiar to women. It purifies, regulates, strengthens and heals. Medicine dealers sell it. No honest dealer will advise you to accept a substitute in order to make a little larger profit.

IT MAKES WEAK WOMEN STRONG, SICK WOMEN WELL.

Dr. Pierce's Pleasant Pellets regulate and strengthen Stomach, Liver and Bowels.

The Education of Children

By Emil Faguet, Member of the French Academy.

YOU cannot expect respect from a child of three years, nor expect that it should know its proper place, but at a very early period in life of the child, you must begin to teach it a certain reverence and make it understand the distance between itself and its parents.

I do not agree with those who want a child to say "sir" instead of "father" and I do not even object to the child-like "papa" up to a certain age, but I do insist on children being taught to address their parents in a respectable manner and not in the same manner as they address their comrades and playmates.

Parents must see to it that respect and love grow together, one feeling never taking the place of the other. When the child grows to be 14 or 15 years old, discreet confidence should take the place of respectful attention. Then the time has come when advice, punishment and sermons or lectures have little or no effect, but must give way to education by example. This seems quite self-evident, but still you will notice that the use of personal example is neglected in a good many families.

You must pass back and forth in the form of a child before the eyes of your child. You must live over again to be able to teach how to live.

You must never begin saying, however: "When I was your age—" for this seems to indicate that you go back to the age of your child merely for the purpose of teaching a lesson. The confidential talk must seem quite natural and spontaneous, a simple memory re-

called only by the present age of the one resembling the past age of the other.

You must never say too much, but must know how to stop the very moment the memory is about to reveal itself in a disguised manner, a sudden perception of a child rapidly discovers.

Then you must always be careful not to praise yourself or boast. Goethe tells how he, after having been cruelly beaten by three mischievous comrades and after having suffered stoically with his hands tied, immediately after the school hours were over, caught one of his tormentors by the throat, threw him down, put his knee on his chest, caught hold of the other with one arm and threw him down and thereupon did the same thing to the third. When he had them all down in the dust, he knocked their heads together until they yelled for mercy.

Now this story may be true, but if Goethe has told it to his children, I am sure they smiled at him and felt some thing quite different from respect.

Remember one very good father. Before his daughters, who were 15 and 20 years old, he told them with eyes that were quite dim with emotion, the story of his honeymoon, his wedding trip, the first days when he dined not at the hotel but at the home of the beautiful places they visited, a number of small incidents and the return home, feeling that after all there is nothing quite different from respect.

Elephant Butte has lately experienced the coldest winter yet. The ice floated in the river all day Wednesday.

Elephant Butte, N. M., Dec. 2.—The greatest excitement at this place for some time was occasioned when fire was discovered at the rear of a cottage occupied by Dr. J. Dale Graham, camp physician. The maid had a short time before the fire was discovered taken out some hot ashes and emptied them at the rear of the house. A short time after the ashes were emptied a load of hot wood arrived and was unloaded on the hot ashes. The maid evidently did not notice the ashes or if they did failed to realize that they were hot and

Use Newbro's Herpicide Instead.

Wearing artificial hair is a harmless deceit of which many ladies are guilty. These women are all objects for sympathy rather than criticism.

Early neglect in the case of the scalp has caused the loss of so much hair that their personal appearance is sadly marred. To correct this defect they resort to artificial hair.

Most ladies would resent any imputation of personal carelessness and neglect. And yet very many women permit their natural hair to become so dull, brittle and lusterless that it looks no better than the artificial.

All this is as unfortunate as it is unnecessary. Hair that is unsightly or thin may usually be attributed to the malevolent action of the dandruff germ. This vicious germ burrows down into the hair follicle, shortly destroying its life. The hair becomes dead, loose and finally drops out.

There is a remedy sold by all druggists, the intelligent use of which will kill the dandruff germ, also cleanses the scalp of all accumulations and makes the hair shine with the luster of life and beauty.

Use Newbro's Herpicide, the Original Dandruff Germ Destroyer. This preparation in one dollar size bottles is sold and guaranteed everywhere.

Applications may be obtained at the barber shops and hair dressing parlors.

The Herpicide Co., Dept. R., Detroit, Mich., will send a nice sample and booklet to you on address upon receipt of 10c in postage or silver. Kelly & Pollard, Special Agents.

PUTS AN END TO INDIGESTION AND A SOUR, GASSY, UPSET STOMACH

A little Diapiesin relieves bad Stomachs in five minutes.

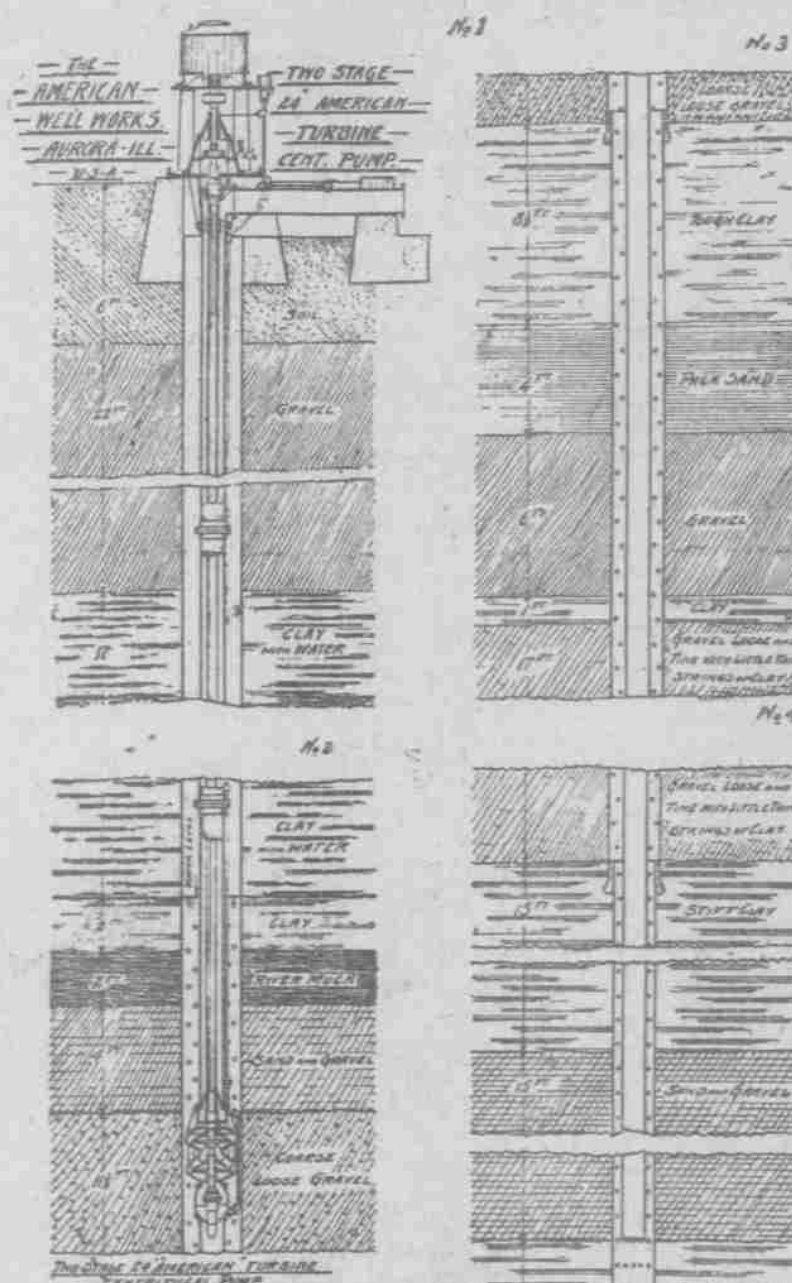

As there is often some one in your family who suffers an attack of indigestion or some form of stomach trouble, why don't you keep some Diapiesin in the house handy?

This harmless blessing will digest anything you can eat and overcome a sour, gassy stomach five minutes after. Tell your pharmacist to let you read the formula, plainly printed on these 50-cent cases of Diapiesin. Indigestion, Sour Stomach, Heartburn and other distress go in five minutes, and relieve at once such miseries as Belching or Gas, Eructations of acid,

The Underground Water of the Mimbres Valley

By R. BEDIKHEK, DEMING, N. M.

The Little Vineyards Company's First Well, Deming, New Mexico.

Log of Well is divided into four sections for convenience in illustrating.

A GLANCE at the accompanying cut will reveal the stratification of valley lands in the vicinity of Deming to a depth of 140 feet. In very few instances has it been necessary to go deeper than 150 feet for sufficient water to furnish the largest irrigation pumps now in use in the valley. The well shown in the cut furnishes 1400 gallons of water per minute, or sufficient water to irrigate 140 acres of land, half in alfalfa and half in general farm crops. Wells have, however, been sunk much deeper than this in the Deming country for irrigation water, the deepest of which was put down 1665 feet. Substantially the same strata recur, the bedrock of the valley having never been found.

Once a Deep Gorge in Mountain. The region is very interesting to the geologist. It is said some scientists think that what is now the wide stretching valley of the Mimbres was once in ages past only a deep gorge in mountains which towers a mile or more high. Other scientific men say that the mountains were never, apparently much higher than they are at present, but have been slowly pushed upward during past ages just about as fast as they have been eroded away. It is quite clear that the formation in the bottom of the valley lying upon the bedrock is the same formation as once capped the mountains, the process of erosion first started, and that the whole valley has been built up in this fashion.

While all this may be very interesting to the scientist, the two points which are most interesting from a commercial standpoint are (1) the water supply of the valley, and (2) its surface soil. In order to understand the nature of the supply, it is first necessary to conceive of the stream in its original condition, before the process of erosion set in. It was a river, flowing in a wide, shallow channel, with some 2000 or more feet of soil and gravel. At that time the river was a rushing torrent, discharging annually something like 400,000 acre feet of water. As the erosion set in, a trickling mountain stream, at other times it was a rushing torrent, hurrying boulders along its course, and grinding them up into gravel. At other times, much of this debris from the mountains was deposited along its course, and the river became a sluggish stream, when sufficient deposits of coarse gravel were made for the stream in its normal condition to find its way through, instead of above them.

Beginning of the River. Here was the beginning of the underground river. The stream was on the surface, water continued their work until a waterway was made through coarse gravel under the surface. The stream was a rushing torrent, discharging annually something like 400,000 acre feet of water. As the erosion set in, a trickling mountain stream, at other times it was a rushing torrent, hurrying boulders along its course, and grinding them up into gravel. At other times, much of this debris from the mountains was deposited along its course, and the river became a sluggish stream, when sufficient deposits of coarse gravel were made for the stream in its normal condition to find its way through, instead of above them.

Gravel Strata to Bed Rock. In the same way all the gravel strata are laid clear down to the bedrock. It is probable that the gravel is deposited in the form of lenses, much as one finds along almost any surface stream, which lenses are of course covered over with soil. Waterways of gravel evidently connect the gravel lenses, which explains the fact of the varying thickness of the gravel strata in wells over the valley. In one place a certain stratum will be found 10 or 15 feet in thickness, at another place only a few hundred feet away, this strata will be only four or five feet thick, so that it is a hazy earth with gravel in the underflow at a point about 20 miles north of Deming. Reservoirs in the form of water bearing strata, extending to a depth of 1665 feet, and how much deeper can only be surmised. And we know further that some 400,000 acre feet are annually discharged into this underflow. There are few regions in the southwest where such an abundance of water is found, and the area to be reclaimed is derived annually, and certainly few where such tremendous reservoirs exist, holding the water in suspension for the convenience of the man with the pump.

Floods Build Up Soil. Little commercially were it not for the fact that the valley is a desert, the soil shows six feet of soil. This is about the average thickness over the valley, although in some portions the soil extends down almost to the first water. Experts would call this a "desert plain" and would describe the soil as "heavy adobe." The adobe is of course an advantage in that it makes cultivation easier. The adobe is a simple, effective and inexpensive process that most farmers are willing to let well enough alone. Besides, a pumping well costs little, while a dam costs a great deal. There are many who contend that the cost of pumping does not exceed the

THE CHURCHES.

FIRST CHRISTIAN.—Corner North Oregon and Franklin streets. Rev. J. Rice, pastor. Services will be held Sunday at 10:30 a. m.; preaching at 11 a. m.; communion at 12 m.; C. E. prayer meeting at 7:30 p. m.; preaching at 7:30 p. m. The morning service will be held at 10:30 a. m. in the evening. The pastor will deliver the first of a series of sermons on the life of Christ, illustrated with the pictures of the world. The pastor will deal with the life of Christ from his birth to manhood.

HOUSTON SQUARE BAPTIST.—Corner Montana and Ange streets. J. J. Bullen, pastor. Bible school meets at 9:15 a. m. The subject of the day will be of special interest because of the first anniversary of the pastor's coming. At the morning service, at 10:30 a. m., the pastor will deliver the first of a series of sermons on the life of Christ, illustrated with the pictures of the world. The pastor will deal with the life of Christ from his birth to manhood.

LUTHERANS OF THE MISSOURI SYNOD.—Our church is at 1109 San Antonio St. English services tomorrow at 10:30 a. m. Theme, The exhortation of St. Paul to Christians, first, to awake out of sleep, and secondly, to walk honestly, as in the day.—Rom. 13:11-14.

EAST EL PASO BAPTIST.—Sunday school at 9:45 a. m.; preaching at 11 a. m. and 7:30 p. m. by the pastor, Rev. E. L. Milligan. Everybody cordially invited.

CALVARY BAPTIST.—Tomorrow: The discourse at 11 a. m. will give an account of the great Texas Baptist convention in Waco, where more than \$25,000 were raised, from which the pastor has just returned. At 7:30 p. m. Dr. Hanks will preach from the words, "Sin, when it is finished, bringeth forth death," and the action of the merchants who refused to give refuge to the fugitives on the horse races and at the time of the Beattie, in Richmond, will be used as illustrations. The Sunday school meets at 9:30 a. m. and 7:30 p. m. A welcome to visitors.

FIRST CONGREGATIONAL.—Crawford theater. Rev. Miles Hanson will give picture sermon illustrated with lantern slides. "The Good Home" of three great artists—Munkacsy, Dore, Guido Reni. 11 a. m. Theater will be warmed.

WESTMINSTER PRESBYTERIAN.—Rev. John E. Abbott, the minister in charge, will preach at 11 a. m. and 7:30 p. m. The theme of the morning discourse will be "Praying God." At the evening service the subject will be, "What Is It to be a Christian?" Sunday school will be held at 9:45 a.

Interest on the difference in expense of the two types of wells. At the present time, the Mimbres river, which flows in a wide, shallow channel, is a rushing torrent, discharging annually something like 400,000 acre feet of water. As the erosion set in, a trickling mountain stream, at other times it was a rushing torrent, hurrying boulders along its course, and grinding them up into gravel. Can This Man Read Your Life?

The Rich, Poor, Exalted and Humble Seek His Advice on Business, Marriage, Finance, Education, Changes, Speculation, Love Affairs, Journeys and All Events of Life.

Many Say He Reveals Their Lives with Amazing Accuracy.

Free Test Readings Will Be Sent for a Short Time to All Herald Readers.

Has the veil of mystery that has so long shrouded the ancient sciences been raised at last? Can it be that a system has been perfected that reveals with reasonable accuracy the character and disposition of an individual and so outlines the life as to assist in avoiding errors and taking advantage of opportunities?

Roxroy, a man who has for twenty years been delving into the mysteries of the occult, making a scientific study of the various methods of reading the lives of people, seems to have reached a higher round on the ladder of fame than his predecessors. Letters are pouring into his office from all parts of the world telling of the benefits derived from his advice. Many of his patrons look upon him as a man gifted with some strange, mysterious power, but he modestly asserts that what he accomplishes is due alone to his understanding of natural laws.

He is a man of kindly feeling toward humanity, and his manner and tone immediately impress one with his sincere belief in his work. A huge stack of grateful letters from people who have received readings from him adds to other convincing proof as to his ability. Even Astrologers and Palmists admit that his system surpasses anything yet introduced.

Edmond Blaquiere, in a letter to Prof. Roxroy, says: "I thank you for my complete Life Reading which is really of extraordinary accuracy. I had already consulted several Astrologers but never before have I been answered with so much truth, or received such complete satisfaction. I am with sincere pleasure that I shall recommend you to my friends and acquaintances; for I feel sure that it would be doing a good action to make your marvelous science known."

If you wish to take advantage of Roxroy's generous offer and obtain a free reading, send your date, month, year of birth, state whether Mr., Mrs. or Miss, and also copy the following verse in your own handwriting:

I have heard of your power To read people's lives. And would you ask what for me You have to advise?

Be sure to give your correct name, birth date and address, and will promptly send your letter to ROXROY, Dept. No. 45H, No. 177A, Kensington Road, London, W. If you wish, you may enclose 50c (stamps of your own country) for post postage, clerical work, etc. Do not inclose coins or silver in letters.

WHAT HER FRIEND ASKED

Mrs. Casey Was Sick in Bed, But Her Friend's Request Resulted in Prompt Cure.

Yonah, Tex.—"For about eight years," says Mrs. R. A. Casey of this place, "I suffered with womanly troubles. I had about given up, and thought I would always have to suffer."

I had pains all over, and was so nervous at times I could hardly stand it to live. I had spells, when I would be in bed several days at a time.

A friend asked me to try Cardul, and I did. I have taken nine bottles, and it cured me. I feel well and strong and have not been sick at all for nearly a year.

Cardul is certainly a boon to suffering women. I do not think I would be alive without it. I shall certainly say good words for Cardul every chance I have, for I wish every suffering woman could know about Cardul and what it can do for her."

You can depend on Cardul, because Cardul is a gentle, harmless, vegetable tonic that can do you nothing but good.

Prepared from herbal ingredients, Cardul has a specific curative effect on the womanly constitution and puts strength where it is most needed. Try it.

N. B.—Write to Ladies' Advisory Dept., Chattanooga, Tenn., for Special Instructions and 64-page book, "Home Treatment for Women," sent in plain wrapper, on request.
